Skills and Progression Map

Design and Technology

'Spirituality is the bitter-sweet yearning for beauty, truth, love and wonder beyond ourselves. It is a longing we pursue together and a treasure we glimpse in ourselves and one another and seek beyond us into eternity. It is life in all its fullness.'

Nebula Spirituality Statement

Harnser Schools - Design and Technology Curriculum Skills and Progression Map

Outlined in the National Curriculum 2	2014, there are four a	given strands of design	and technology:
outilited in the Hational Carricalant E	,c. c a. c .oa. ,	Sireii sei aiias ei aesigii	arra ccomiology.

- Design
- Make
- Technical Knowledge
- Evaluate

We have based our curriculum around these 4 strands, with children covering all necessary elements through each school year.

By building our curriculum around 3 key areas of Design and Technology – Textiles, Construction and Food and Nutrition – we ensure the children build on their skills yearly, regardless of which year or class they are in. In mixed-year classes, this means the main strands are met and thoroughly developed each year. Regardless of whether children are staying in the same class, or moving on to their next class, they have met and built on the series of skills with increased confidence and accuracy.

Key language has also been set out for each year group on the skills progression map and builds upon and incorporates the previous years' vocabulary.

DESIGN AND TECHNOLOGY: AGE RELATED STATUTORY COVERAGE		
EYFS Statutory Framework	KEY STAGE ONE	
Expressive Arts and Design The development of children's artistic and cultural awareness supports their imagination and creativity. It is important that children have regular opportunities to engage with the arts, enabling them to explore and play with a wide range of media and materials. The quality and variety of what children see, hear and participate in is crucial for developing their understanding, self-expression, vocabulary and ability to communicate through the arts. The frequency, repetition and depth of their experiences are fundamental to their progress in interpreting and appreciating what they hear, respond to and observe.	 drawing, templates, mock-ups and ICT Make Select from and use a range of tools and equipment to perform practical tasks 	
 ELG: Creating with Materials Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function Share their creations, explaining the process they have used Make use of props and materials when role playing characters in narratives and stories 	 Evaluate Explore and evaluate a range of existing products Evaluate ideas / products against design criteria Technical knowledge Build structures, exploring how they can be made stronger, stiffer and more stable Explore and use mechanisms in their products. Use the basic principles of a healthy and varied diet to prepare dishes Understand where food comes from. 	

DESIGN AND TECHNOLOGY: AGE RELATED STATUTORY COVERAGE

KEY STAGE TWO

Design

- Use research and develop criteria to inform the design of innovative, functional, appealing products that are fit for purpose
- Generate, develop, model and communicate ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

Make

- Select from and use a wider range of tools and equipment to perform practical tasks accurately
- Select from and use a wider range of materials and components

Evaluate

- Investigate and analyse a range of existing products
- Evaluate ideas and products against own design criteria and consider the views of others
- Understand how key events and individuals have helped shape the world

Technical knowledge

- Apply their understanding of how to strengthen, stiffen and reinforce more complex structures
- Understand and use mechanical systems in their products
- Understand and use electrical systems in their products [for example, series circuits incorporating switches, bulbs, buzzers and motors]
- Apply understanding of computing to program, monitor and control products.
- Understand and apply the principles of a healthy and varied diet
- Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques
- Understand seasonality and know where and how a variety of ingredients are grown, reared, caught and processed.

Design and Technology Skills Progression

Expected Standard

EYFS

Design

- Begin to draw on their own experiences to help generate ideas
- To begin talking about their design ideas
- With support, communicate ideas in different ways
- Selects appropriate resources and adapts work where necessary
- To know the different uses and purposes of a range of media and materials

Make

- Make a product for a set purpose
- Independently mark out, cut and shape a range of materials
- Use tools for their intended purpose

Evaluate

- Discuss their likes and dislikes relating to their product
- Begin to think about amendments that could improve their product
- Ask questions of their peers to improve a product
- Problem solve and reflect on their designs and creations
- Share their creations, explaining the process they have used

Design and Technology Skills Progression			
Expected Standard			
	Ye	ar 1	
DESIGN		MAKE	
 To draw on their own experience to he 	elp generate <mark>ideas</mark>	 To make the 	eir <mark>design</mark> using appropriate techniques
 To suggest ideas and explain what the 	y are going to do	• To measure,	e, mark out, cut and shape a range of materials, with help
 To recognise that there are different w 	vays to communicate an idea	 To use tools 	s (eg scissors and a hole punch) safely
		•	le finishing techniques to improve the appearance of their
		product	
TECHNICAL KNOWLEDGE – TEXTILES	TECHNICAL KNOWLEDGE – CON		FECHNICAL KNOWLEDGE – FOOD AND NUTRITION
 To know about different printing methods, potato printing, transfer, 	 To talk about the different m and what mechanisms make 		 To understand basic principles of a healthy and varied diet
fabric pens	To select from and use a wid	-	
To begin to recognise different	materials and components:	•	
types of fabric	lollipop sticks, boxes	•	- I to the second of the secon
 To explore ideas on existing 			pestle, cake mixer, potato masher, blender
products, such as logos, prints,	finish; glue, scissors, cellotape •		
designs	 To know about different mechanisms such To 		To evaluate the taste of different foods
To explain what tool is best for	as: levers, sliders, wheels or axels		To understand where food comes from
printing and why	To understand how you might make a		To understand why we must wash hands and make
 To know how each tool is used to create print 			sure that surfaces are clean
EVALUATE			
• To evaluate their product by discussing	g how well it works in relation to	the purpose	
• To evaluate their products as they are	$developed, identifying \ strengths$	and possible chan	nges they might make
 To evaluate their product by asking qu 	iestions about what they have ma	ide and how they	have gone about it
Greater Depth			
EXTILES CONSTRUCTION			FOOD AND NUTRITION
 To use a variety of materials/tools to c 	 To use a variety of materials/tools to create To use more than or 		 To adjust recipe based on taste
prints	To use a range of sti	rong and stable	 To look at and evaluate health factors
To create print with a specific theme	materials		

	Design and Techno	logy Skills Progres	ssion
Expected Standard			
	Ye	ear 2	
 To generate ideas by drawing on their own and other people's experiences To develop their design ideas through discussion, observation, drawing and modelling To identify a purpose for what they intend to design and make 		 MAKE To begin to select tools and materials; use vocab' to name and describe them To measure, cut and score with some accuracy To use hand tools safely and appropriately 	
 To identify simple design criteri To make simple drawings and la 			 To choose and use appropriate finishing techniques
TECHNICAL KNOWLEDGE – TEXTILES To recognise different designs and functions of a product To continue to recognise different forms of fabric To know different ways to join materials together – glue, sew, cellotape, stapling To know how to make key elements more secure To use a running stitch	 TECHNICAL KNOWLEDGE – CONSTRUCTION To choose materials based on their properties To know the appropriate tools to join/stick To understand how to make structures stiffer and stronger To select and use appropriate tools to join materials To select strong and durable materials 	 To discuss w To know interproduct To identify to blending To understate appropriate To know application To select here 	OWLEDGE – FOOD AND NUTRITION what they like to eat in relation to the chosen product seresting combinations of ingredients for their themed the best tool/equipment to perform practical tasks (cutting, and the importance of safety when handling tools & teach e skills to use propriate hygiene practises (I.e. hand washing, food ealthy and varied ingredients cood safely and appropriately
 To evaluate against their design criteria To evaluate existing products to identify functions and purpose To evaluate their products as they are developed, identifying strengths and possible changes they might make To talk about their ideas, saying what they like and dislike about them Greater Depth			
TEXTILES • To use multiple joining strategie	CONSTRUCTION	FO	OD AND NUTRITION To identify health factors of their snacks (calories, sugars, fats, etc.)

To understand and use appropriate

handwashing procedures

	Design and T	echnology Skills Progression	
	E	xpected Standard	
		Year 3	
DESIGN		MAKE	
To generate ideas for an item, considering its purp	oose and the	To select tools and techniques for making their product	
user/s		• To measure, mark out,	cut, score and assemble components with more
To identify a purpose and establish criteria for a s	uccessful	accuracy	
product		To work safely and according to the safely according to the s	urately with a range of simple tools
To plan the order of their work before starting		To think about their ideas as they make progress and be willing change things	
To explore, develop and communicate design pro	posals by		
modelling ideas		To use finishing techniques to strengthen and improve the appearance of	
To make drawings with labels when designing		their product	
TECHNICAL KNOWLEDGE – TEXTILES	TECHNICAL	KNOWLEDGE –	TECHNICAL KNOWLEDGE – FOOD AND NUTRITION
To know the appropriate stitch to ensure	CONSTRUCT	ION	To discuss healthy foods
security	To know	of appropriate tools to cut	 To think of an appropriate set-up (crockery,
 To know appropriate tools to use when cutting, 	materia	ls	cutlery, utensils)
joining, and finishing	To know	which materials could be	 To think of how to present the food (garnish,
To understand how to thread a sewing needle	used to	make their product	portion size)
and use a neat, even running stitch	appealir	ng	To recognise where food comes from by season
To select and use appropriate tools to	• To unde	rstand mechanical systems	To understand use of tools when
manipulate materials for e.g. cutting and joining	To choo	se appropriate tools and	handling/manipulating the ingredients
To show an awareness of a range of different	join mat	erials	To understand what a healthy balanced diet is
fabrics	•		To understand/learn how to appropriately use
To apply decoration using beads, buttons or			utensils necessary to manipulate the ingredients
feathers			To select and use a wide range of food

EVALUATE

- To evaluate their product against original design criteria e.g. how well it meets its intended purpose
- To disassemble and evaluate familiar products
- Peer evaluate designs saying something you like

Year 3 Greater Depth		
TEXTILES	CONSTRUCTION	FOOD AND NUTRITION
 To think about existing designs and 	To independently include more than one	To create a theme within their food
compare/contrast with their own	type of mechanism or electrical component	 To consider a target market (age, gender,
	in their design	etc.)

textures for purpose

	Design and Technology Skills I	Progression		
Design and Technology Skills Progression Expected Standard				
Year 4				
DESIGN To generate ideas, considering the purposes for which they are designing To make labelled drawings from different views showing specific features		MAKE • To select a product	appropriate tools and techniques for making their	
 To develop a clear idea of what has to be done, planning how to use materials, equipment and processes, and suggesting alternative methods of making, if the first attempts fail To evaluate products and identify criteria that can be used for their own designs 		To measu using app	re, mark out, cut and shape a range of materials, ropriate tools, equipment and techniques nple graphical communication techniques	
 TECHNICAL KNOWLEDGE – TEXTILES To understand use of tools when sewing/weaving (needles, etc.) To understand how to use a sewing needle and how to secure an embellishment onto material To select appropriate materials to use To select appropriate tools to use (needle, glue, etc.) To apply a decoration using a needle and thread To develop a back-stitch skill alongside the running stitch 	TECHNICAL KNOWLEDGE – CONSTRUCTION To have an understanding of how strengthen, stiffen and reinforce more complex structures To know how to create a box for purpose To select and use appropriate tool and materials To appropriately use a mechanism for a set purpose To begin to recognise electrical systems in their product	 To kno To und rolling To kno product To und To beg To reco To exp based To sele 	ow ingredients typically used in their ct/recipe derstand how to use specific preparation tools gin to understand how to use cooking appliances ognise ingredients typically used in their product alore existing recipes in order to create own recipe on ingredients and health factors ect and use appropriate ingredients according to	
the running stitch systems in their product taste, colour, and texture • To evaluate their work both during and at the end of the assignment • To evaluate their products carrying out appropriate tests • To peer evaluate using 2 stars and a wish				
TEVTUES	Greater Depth		FOOD AND MUTDITION	
TEXTILESTo use a range of materials, considering	CONSTRUCTIONCreate a switch as part of the part o	product	FOOD AND NUTRITIONTo create a brand design for their product	

	Design and Technology Skills Progression	
	Expected Standard	
	Year 5	
 To generate ideas through brainstorming and identify a purpose for their product To draw up a specification for their design To develop a clear idea of what has to be done, planning how to use materials, equipment and processes, and suggesting alternative methods of making if the first attempts fail To use results of investigations, information sources, including ICT when developing design 		 MAKE To select appropriate materials, tools and techniques To measure and mark out accurately To use skills in using different tools and equipment safely and accurately
ideas TECHNICAL KNOWLEDGE – TEXTILES To understand the use of different example of a set product To know about different product designs in order to create a product for a specific use and purpose To know different stitches: running stitch, back stitch, blanket stitch To know different tacking techniques for buttons, material, sequins To demonstrate precision and purpose whe modifying threads and fabrics.	TECHNICAL KNOWLEDGE – CONSTRUCTION • To know use of a range of tools and equipment to perform practical tasks [e.g. cutting, shaping, joining and finishing] • To show an understanding of how to strengthen, stiffen and reinforce a complex structure • To understand and use mechanical systems in their products (cams,	TECHNICAL KNOWLEDGE – FOOD AND NUTRITION To understand how to create a recipe To understand appropriate tools to use (cutting, peeling) To know how to use different cooking techniques (stove, hob, etc.) To understand how to use specific preparation tools To understand how to use cooking appliances appropriately and safely
 To evaluate a product against the original To evaluate it personally and seek evaluati To peer evaluate using 2 stars and a wish a 	on from others gainst design criteria	
	Greater Depth	
 TEXTILES To use layered materials for a specific purpose (ie to create a compartment) 	 To include more than one mechanism in a product 	 To consider how the dish could be adapted to be hot/cold and the effect on the product

Design and Technology Skills Progression		
Expected Standard		
Year 6		
MAKE		
ough detailed labelled drawings • To select appropriate tools, materials,		
n components and techniques		
• To assemble components to make working		
unicate aspects of their design proposals by modelling their ideas in a variety of models		
To use tools safely and accurately To use tools safely and accurately		
choosing appropriate materials, tools and techniques • To make modifications as they go along		
s specific target group To achieve a quality product TECHNICAL KNOWLEDGE – CONSTRUCTION TECHNICAL KNOWLEDGE – FOOD AND NUTRITION		
propriate • To know use of a range of materials • To know what ingredients to use in recipe		
product To know and understand use of tools and equipment suitable for the task To know the features needed to write a step-by-step recipe, including a list of ingredients, equipment, and utensils		
 To know how to reinforce/strengthen a 3D To know which tools and equipment are suitable for cooking 		
w to tack framework specific food item		
To understand how certain mechanisms create To know how to prepare and cook dishes safely and		
tools for movement hygienically		
• To explore existing products in order to design • To understand how to use specific preparation tools and		
chniques an annotated sketch of a new idea techniques		
to use for e.g. type of stitching • To successfully use cams, pulleys or levers in • To select and implement appropriate and safe of		
order to create movement techniques		
read and • To use an electrical system in their product, e.g. • To prepare and cook dishes safely and hygienically, using		
switches, volatage, bulbs, buzzers, or motors appropriate and hygienic food handling procedures		
g drawings with labels		
To evaluate against their original criteria and suggest ways that their product could be improved		
To peer evaluate against original criteria and suggest an improvement		
Year 6 – Greater Depth		

Year 6 − Greater Depth TEXTILES • To consider how to create this product using 'upcycling' • To encompass all learning independently when creating and making their design • To consider a menu that this meal would feature in

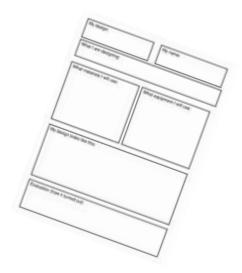

Provision for Pupils with SEND

Here are some recommendations for ways our Design and Technology curriculum can be adapted to meet the needs of children with SEND. *Please note, this is an example of adaptations and is not an exhaustive list.*

- Word banks for pre-learning and to support during lessons: topic vocabulary, imperative verbs, resource vocabulary
- Children working below ARE could have adapted activities that meet the skills from year groups below their own
- Adult support when working in practical sessions
- Pre-prepared resources when working in practical sessions
- Use a range of methods to record their design and evaluation elements: typing, filming, recording, drawing...
- Group work or paired work to assist each other
- Additional scaffolding activities 1:1 or small-group
- Adapted tools to suit need and ability

<u>Design and Technology Curriculum – Knowledge and Extended Opportunities</u>

Writing Opportunities may take place within a Design and Technology lesson or within an English lesson. Regardless, if the piece has a D&T focus, the success criteria for the piece will be design-rooted. That said, if a task lends itself well to a teaching opportunity in English, it may be that the teacher chooses to structure and scaffold the writing piece, creating an extended and independent piece of work that interweaves elements from across the curriculum.

The examples of deeper thinking questions are non-exhaustive and just give an example of questions that might be used throughout each Design and Technology topic to give the children further opportunities to share their learning. Teachers will use their discretion when selecting deeper learning questions and they are free to adapt, change or create new questions to support/challenge the children further.

	Possible Writing Opportunities	Deeper Learning Question Examples
EYFS	LabelsCaptionsSimple picture instructions	 What is the difference between and? How would I use?
Key Stage 1	 Factfile Labels Captions Simple picture instructions Posters Evaluations Adverts 	 What would happen if? How doeschange this? What materials would be the best for? What can you do to improve?
Key Stage 2	 Instructional writing/recipes Captions and annotations Adverts/branding Instructional writing/recipes Advertisements Propaganda posters Narrative relating to a product Food reviews 	 What are the strengths and weaknesses of? How could I make more economic? How does affect? How could it be made more environmentally friendly? How can I make more ergonomic? What effect would budget have on?

Design and Technology Curriculum - Cross Curricular Links and Curriculum Enrichment

Where possible, the individual subjects within our curriculum lend themselves to a variety of cross-curricular or inquiry-based tasks. This gives the children a greater purpose to their learning, making further links to the wider world and to developing the skills they are being taught.

These examples of cross-curricular links are non-exhaustive and just give an example of ways the curriculum subjects can enhance the children's learning. Teachers will use their discretion when selecting these opportunities, so as to avoid tenuous links, while making the learning purposeful and engaging.

DESIGN AND TECHNOLOGY: Cross-Curricular Links

- English the children will develop their writing skills throughout Design and Technology; an example of this is through instructional writing or labelling diagrams
- Maths children will need to be accurate with measurement and have an awareness of shape
- Art children may study and replicate the work of famous artists and architects, using similarities in their Design and Technology work
- **History/Geography** we use a topic-based approach to teaching and so you will find links to our History and Geography work throughout Design and Technology

DESIGN AND TECHNOLOGY: Curriculum Enrichment

- School trips to places such as: Sainsbury Centre, Castle Museum, Museum of Norwich, Gressenhall
- Visitors in school from a design or technology profession
- Outreach activities within the community
- Whole-school **D&T projects** with a common theme or art strand
- Parent workshops to create collaborative pieces
- After-School or lunchtime D&T clubs
