

Creativity , courage and friendship

Design Technology

Design and Technology at Frettenham develops our pupil's skills and knowledge in design, structures, mechanisms, electrical control and a range of materials, including food. We feel it is vital to nurture creativity and innovation through design, and by exploring the designed and made world in which we all live and work. This encourages their inventiveness and encourages them to think about important issues and how to solve them. Our DT curriculum uses contexts linked to other curriculum areas to help generate realism and purpose for design tasks and making functional products. Courage is central to the design and making process, with children having to commit to choosing materials and having belief in their skills to be able to complete their products and ideas successfully. Friendship is fostered through often collaborating on design ideas and working in pairs or groups to bring their ideas to life.
