

Creativity , courage and friendship

Geography

Through learning the key skills of Geography, our children can develop a sense of place and belonging in their community. They will begin to build a bond with the world around them and friendships with those who share it with them. They are given the courage to explore their local area and to investigate and find out more about the world. They think creatively to make links and gain an understanding of how places and environments are similar, as well as of those aspects which make them so very diverse.
