

# Creativity , courage and friendship

## Maths

At Frettenham Primary School we ensure all pupils have the time and are encouraged to explore all the varied aspect of maths and apply them to the world around them. Our values of Creativity, Courage and Friendship are ever present in out curriculum and daily lessons. Children are encouraged to be courageous with their ideas and questions. They are challenged to develop a 'have a go' attitude to their learning and not to be afraid to make mistakes. Creativity is promoted through the way children approach their maths, looking to see how best to solve a problem and exploring how their knowledge can be used to support other areas of the maths and learning. Friendship is also key with Maths as children support each other, work collaboratively and share and appreciate each-others ideas with lessons
