

Creativity , courage and friendship

RE

At Frettenham Primary School, we teach RE with the express desire to foster religious literacy. We believe that this leads to a greater understanding between people of different beliefs and none. We ensure creativity through the way the religions and ideas are explored to ensure children develop a deep understanding of the topics and are able to develop courage to promote tolerance and challenge viewpoints and ideas which are damaging to our school and wider community. Within each topic creativity is nurtured with challenging questioning and providing the children with the time to discuss and problem solve. Friendship is core to our RE curriculum, as children are able to explore a wide range of viewpoints, allowing a greater understanding of each other.
