

## Christian Distinctiveness

<b>Overview</b>	<p>At St Faiths' Primary School, we ensure that the teaching of our Science curriculum embodies our Christian Distinctiveness and gives our children the chance to be the best they can be. We regularly refer to and reinforce our School Values:</p> <p style="text-align: center;"><b>Compassion, Responsibility, Honesty, Forgiveness and Perseverance</b></p> <p>Through our Science curriculum, we believe our children are given a variety of opportunities to explore different ways of learning and points of view. In doing so, we give the children the tools and skills needed to develop a deeper understanding of the modern world, individual and collective <b>responsibility</b>.</p> <p>Our rich and varied Science curriculum encourages pupils to explore, challenge and wonder at the world around them. Our Science curriculum teaches children to show <b>compassion</b> and love for the natural world for all of its diversity and ask questions about how and why. We teach children to have hope in the advances of science, <b>perseverance</b> to pursue their own ideas and investigations and to develop an appreciation for how we can take responsibility for the world around us. Through gaining an understanding of the Science behind our natural world, pupils gain a deepening appreciation of differences, in both animals and humans.</p>
<b>Our Story: Noah's Ark</b>	<p>Through the teaching of a range of religious stories, such as our school Bible story of Noah's Ark, we further reinforce the idea that everyone is included at our school, regardless of their own life story and how different that might look to our own. By following God's word, everyone will <b>flourish</b>.</p>
