E Safety & Internet Usage Policy

Introduction

This document is a statement of the aims, principles and strategies for the safe use of electronic equipment at the schools in the Nebula Federation.

This policy will be reviewed annually.

In accordance with the aims and values of the Nebula Federation this e safety policy will set out how a positive and safe learning environment can be achieved.

The ethos of a School has considerable influence on the general behaviour of its children and to this end it is important that it is both understood by all concerned and regularly monitored and reiterated.

At the schools in the Nebula Federation we have high expectations of both work and behaviour and consider that the interactions between staff and children, and children and children are crucial to realise these.

E Safety & Internet Usage Policy

E Safety And Internet Usage

E safety encompasses internet technologies and electronic communications such as mobile phones and wireless technology. It highlights the need to educate children about the benefits and risks of using new technology and provides safeguards and awareness for users to enable them to control their online experiences.

The Nebula Federation's E safety policy will operate in conjunction with other policies including those for, Behaviour, Anti-Bullying, Safeguarding, Child Protection, Mobile Phone and Electronic Devices, Data Protection, Image Consent Form and Security.

Background - Why Is Internet Use Important?

The purpose of internet use in school is to raise educational standards, to promote pupil achievement, to support the professional work of staff and to enhance the school's management information and administration systems.

Internet use is part of the statutory curriculum and a necessary tool for learning. It is an essential element in 21st century life for education, business and social interaction. Access to the internet is therefore an entitlement for pupils who show a responsible and mature approach to its use and our schools have a duty to provide pupils with quality internet access. Many pupils will access the internet outside school and will need to learn how to evaluate online information and to take care of their own safety and security.

How Does Internet Use Benefit Education?

Benefits of using the internet in education include

- access to world-wide educational resources including museums, libraries and art galleries
- rapid and cost effective worldwide communication
- inclusion in the National Education Network which connects all UK schools
- educational and cultural exchanges between pupils worldwide access to experts in many fields for pupils and staff
- professional development for staff through access to national developments, educational materials and effective curriculum practice collaboration across support services and professional associations
- improved access to technical support including remote management of networks and automatic system updates
- exchange of curriculum and administration data with the Local Authority
- access to learning wherever and whenever convenient; greatly increased skills in Literacy in times of lockdowns and COVID 19, internet access allows students to continue learning remotely

How Can Internet Use Enhance Learning?

- The school internet access is designed expressly for pupil use and includes filtering appropriate to the age of our pupils

- Children will be taught what internet use is acceptable and what is not and given clear objectives for internet use
- Internet access will be planned to enrich and extend learning activities
- Staff will guide pupils in online activities that will support learning outcomes planned for the pupils' age and maturity
- Pupils will be educated in the effective use of the internet in research, including the skills of knowledge location, retrieval and evaluation

Good Habits

E safety depends on effective practice at a number of levels:

- Responsible ICT use by all staff and pupils; encouraged by education and made explicit through published policies.
- Sound implementation of E-safety policy in both administration and curriculum, including secure school network design and use.
- Safe and secure broadband from the provider including the effective management of content filtering.
- National Education Network standards and specifications.

Dangers To Consider

Some of the dangers children may face include:

- Access to illegal, harmful or inappropriate images or other content
- Unauthorised access to/loss of/sharing of personal information
- The risk of being subject to grooming by those with whom they make contact on the internet
- The sharing/distribution of personal images without an individual's consent or knowledge
- Inappropriate communication/contact with others, including strangers
- Cyberbullying
- Access to unsuitable video/internet games
- An inability to evaluate the quality, accuracy and relevance of information on the internet
- Plagiarism and copyright infringement
- Illegal downloading of music or video files
- The potential for excessive use which may impact on the social and emotional development and learning of the young person.

As with all other risks, it is impossible to eliminate those risks completely. It is therefore essential, through good educational provision to build pupils' resilience to the risks to which they may be exposed, so that they have the confidence and skills to face and deal with these risks. We must demonstrate that we provide the necessary safeguards to help ensure that we have done everything that could reasonably be expected of us to manage and reduce these risks. The E safety policy that follows explains how we intend to do this.

- Pupils are expected not to use any rude or offensive language in their email communications, and contact only people they know or those the teacher has approved.

Pupils must ask permission before accessing the internet and have a clear idea of why they are using it.

Published Content & The School Website

- The contact details on the web site should be the school address, email and telephone number. Staff or pupils personal information will not be published.
- The executive head teacher or nominee will take overall editorial responsibility and ensure that content is accurate and appropriate

Publishing photographs, images and work

The General Data Protection Regulation came into force from the 25th May 2018. This has placed additional obligations on organisations which will affect how they handle data.

As schools, we regularly use photographs to show how our pupils and the schools as a whole develop. Images can also help us illustrate and communicate with parents about upcoming events and can help advertise and market the schools to prospective parents and pupils. We are also aware that parents and pupils really enjoy being able to see their images and would like to give all pupils this opportunity.

There are a number of instances when the school may take photos of your child, specifically: -

- We publish photos on the school's website to promote the school to current and prospective parents as well as providing updates on current events;
- We publish photos on our social media accounts [such as Facebook, Twitter] to provide updates on events and news within the school. The school ensures that its privacy settings are such to limit viewing of photos to followers of the school accounts (as approved by the school);
- From time to time we put videos on our You Tube channels which can be seen by subscribers to our channel;
- Within our newsletters, we may provide photos of recent events or achievements from our pupils;
- In order to promote the school, we send out prospectuses, flyers, leaflets and brochures which contain images to show life at our school. These will be sent to prospective parents;
- We may also use other promotional materials such as banners and signs which may contain photographic images for prospective parents to view;
- We may be visited by the media who will take photographs or film footage of events. Pupils will sometimes appear in these images, which may then be published in local or national newspapers, in televised news programmes and on social media sites;
- We publish photos in and around the school building to illustrate to current pupils and parents life around the school including educational materials and images of recent trips and events. These can be seen from time to time by other parents or visitors within the school;
- In promotional materials to show the history and character of the school to future generations.

We follow guidance as set by data protection legislation (mainly the General Data Protection Regulation) as well as guidance set by the Information Commissioner's Office on taking photos in schools and obtaining consent.

The data protection laws give children rights over their own data where they are considered to have the required capacity to understand their data rights. Most children will reach this level of understanding from the age of 12 and so it is unlikely that it will be necessary for our schools to obtain this consent from the child directly.

Usually pupils will not be named in the photographs unless specific consent is gained in the first instance.

Information System Security

- School ICT systems capacity and security will be reviewed regularly
- Virus protection will be installed and updated regularly
- Security strategies will be discussed with our technical support team and broadband provider if necessary

Protecting Personal Data

The Nebula Federation is committed to protecting the privacy and security of personal information. Our schools' privacy notice describing how we collect and use personal information about pupils in accordance with the General Data Protection Regulation (GDPR), Section 537A of the Education Act 1996 and Section 83 of the Children Act 1989 is available on the schools' websites.

Assessing Risks

The school will take all reasonable precautions to prevent access to inappropriate material.

However, due to the international scale and linked internet content, it is not possible to guarantee that unsuitable material will never appear on a school computer. The school cannot accept liability for the material accessed, or any consequences of internet access.

- The school will audit ICT use to establish if the E safety policy is adequate and that the implementation of the E safety policy is appropriate

Handling E safety Complaints

- Complaints of internet misuse will be dealt with by a senior member of staff
- Any complaint about staff misuse must be referred to the executive head teacher
- These will be logged and dealt with as deemed appropriate by the head teacher

Letter sent home to all pupils and their parents of KS2. KS1 will have same letter but with their Acceptable Use Agreement

Dear Parents

In school we have access to the internet. This is a powerful tool which opens up new opportunities for everyone and promotes effective learning. At the Nebula schools we are aware that young people should have an entitlement to safe internet access at all times. However, schools and parents have a duty of care to protect children and ensure that internet use is responsible and safe.

We strongly recommend that children do not use social network sites such as Facebook, Instagram, Snapchat or have YouTube accounts at home. These carry an age-restriction of 13 years old and pose a risk to children. Social networks have no place in our school and so school staff should not be approached by pupils or parents online or invited to join.

Your child has read the following **Acceptable Use Agreement** in class with their teacher. Once they have fully understood them all, your child has signed their name to agree to stick by them. Please read them again at home with your child to show your support of the school in this important aspect of our work. Thank you.

- I will use the school computers and technology sensibly
- I will ask permission from an adult before I look at the internet
- I will only log on using my own username and password which I will keep confidential

Use of Communication and Information Technology In School

A wide range of rapidly developing communications technologies has potential to enhance learning. The following table shows how the school currently considers the benefit of using these technologies for education outweighs their risks / disadvantages:

- Any digital communication between staff and parents must be professional in tone and content
- Pupils should be taught about email safety issues, such as the risks attached to the use of personal details. They should also be taught strategies to deal with inappropriate emails and be reminded of the need to write emails clearly and correctly and not include any unsuitable or abusive material.
- Personal information should not be posted on the school website and only official email addresses should be used to identify members of staff.
