

Creativity , courage and friendship

English

At Frettenham Primary School we ensure the teaching of our English curriculum promotes our school Values of Creativity, Courage and Friendship. We believe by exposing the children to a wide variety of high quality texts we provide the opportunity for the children to have the courage to share, explore and challenge ideas, while at the same time encouraging a deeper understanding and acceptance of the world around us. We also encourage the children to be creative with their ideas and write with courage exploring their ideas fully. Through English strong friendships are created and fostered as children support each other, discuss ideas and shared reading and even respectfully challenge points of view.
