

Christian Distinctiveness

Overview

At St Faiths' Primary School, we ensure that the teaching of our Computing curriculum embodies our Christian Distinctiveness and gives our children the chance to be the best they can be. We regularly refer to and reinforce our School Values:

Compassion, Responsibility, Honesty, Forgiveness and Perseverance

Through our Computing curriculum, we believe our children are given a variety of opportunities to explore different ways of learning and points of view. In doing so, we give the children the tools and skills needed to develop a deeper understanding of the modern world and those within it.

Having such a varied and current curriculum allows the children to understand their place in an ever-changing digital world. This **responsibility** for technology use is instilled throughout the school. We hold regular e-safety days to help the children understand the importance of staying safe online and promote **honest** discussions about the consequences of misuse. The children work hard to **persevere** and develop new skills that will help as they grow up and head on through their learning journey. Being **compassionate** learners means the children can access and work with new technologies, learning where they fit in the wider electronic world.

Our Story: Noah's Ark

Through the teaching of a range of religious stories, such as our school Bible story of Noah's Ark, we further reinforce the idea that everyone is included at our school, regardless of their own life story and how different that might look to our own. By following God's word, everyone will **flourish**.
